PRESS RELEASE

Issued: Monday, 18 September, 2006

Six Penny Wood Exhibition Shows Positive Results

Around 140 people attended the Sixpenny Wood Wind Farm exhibition at the Shire Hall in Howden on Thursday September 14, to view the plans for the proposed wind farm between Howden and Gilberdyke.

Matt Kelly, Project Development Manager for Your Energy Ltd said "We had a very productive day and it was great to speak to everyone who attended. We were able to put a lot of local residents' minds at ease and dispel a lot of the myths surrounding the wind farm."

He added "We have searched across the East Riding area, and due to aviation radar, population density, and ecological issues there are not a lot of places where wind farms can go. We have undertaken extensive studies and these show that it is a good site, with minimal environmental impacts, and Sixpenny Wood will help the region meet up to 80% of its renewable energy targets."

40 people completed a questionnaire when leaving the exhibition, and of the people that expressed a view, 70% of people support the proposal.

Richard Mardon, Managing Director stated "We are very pleased with the result of the survey. It would seem that by coming along and discussing the plans with us, people have made an informed decision."

Those who were unable to attend the exhibition can view up to date information in the newsletter on the consultation website, www.sixpennywoodwindfarm.com or phone 020 7563 4747 for a copy to be posted.
